

1. Locate the correct work Folder/Directory
This is the folder you want to compress and turn in.

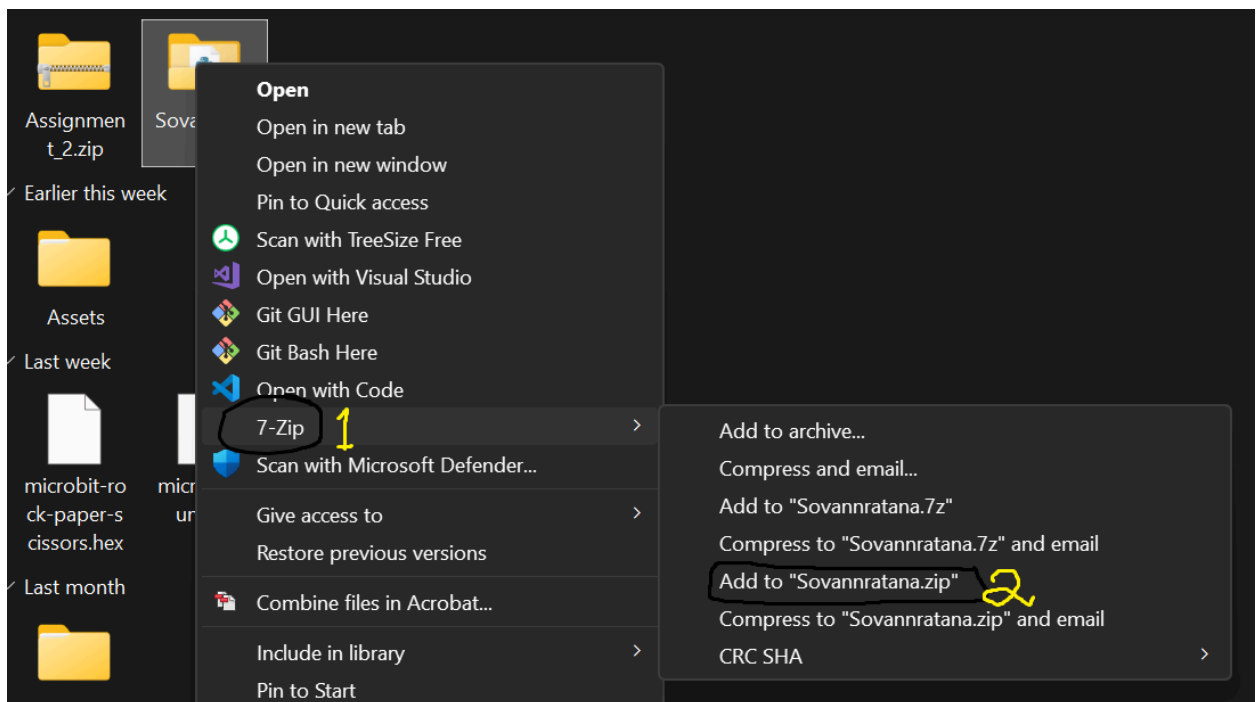

Note: You may have two or more folders with the same name as your work folder. Make sure you select the correct one (usually not the .zip one).

2. Rename the work folder to your full first name

3. Select the folder and right-click. Locate 7zip to compress your file to a .zip file.
If you can compress without 7zip you may do so.

4. Go to ratanakhek22.github.io and locate the assignment TURN-IN link.

Welcome to ESI CS!

This is the page we will be using for various things. Resources for extra practice or information/notes from class will be found here. Class information like syllabus and schedule will also be here. The ARG and such will also be hosted on this site, but won't be visible until the day of.
