

# Project/Problem Set

# Goal

Given a formula or calculation algorithm, write a script that will do the calculation and print the answer.

# Ex Problem Walkthrough

## Problem 1 - C° to F°

Celsius to Fahrenheit

$$F = \frac{9}{5}C + 32$$

## Problem 2 - F° to C°

$$^{\circ}\text{C} = (^{\circ}\text{F} - 32) \times \frac{5}{9}$$

**Problem 3 - Inch to Foot**

**Problem 4 - Foot to Yard**

**Problem 5 - Yard to Mile**

**Problem 6 - Rectangle Area**

**Problem 7 - Rectangle Perimeter**

**Problem 8 - Square Area**
